Currents Editorial Advisory Work Group, American Society for Dermatologic Surgery

Editorial Board:

Editorial Board, New Beauty Magazine
Editorial Board, Cosmetic Dermatology
Editorial Board, Skin and Aging
Editorial Board, Journal of Drugs in Dermatology (JDD)

Clinical Research:

Investigator-A Phase III, Randomized, Placebo-Controlled, Multi-Center, Double-Blind Study of the Safety and Duration of Efficacy of Reloxin (Botulinum Type A Toxin) in Correction of Moderate to Severe Glabellar Lines (and including a Sub-Study to Detect Any Treatment-Related QT Interval Changes)

Investigator- A Phase III, Multi-Center, Randomized, Double-blind, Vehicle-Controlled, 4-Arm, Parallel Group Comparison Study Comparing the Efficacy and Safety of Clindabene (1/2.5) Gel, Clindabene Vehicle, Clindamycin (1%), and Benzoyl Peroxide (2.5%) Gels in the Treatment of Moderate to Severe Acne Vulgaris

Investigator – Juvederm Experience Trial for correction of moderate to severe naso-labial folds and have had their naso-labial folds treated with Restylane within the last 12 months.

Investigator – A Randomized, Double Blind, Vehicle-Controlled Multi-Center Study of the Safety and efficacy of 4% Trademane (Fluorouracil) Cream Versus its Vehicle Cream in the Treatment of Actinic Keratosis

Investigator- Comparative Evaluation of the Fabric Bleaching potential of Duac Topical Gel and Benaclin when used for the Treatment of Facial Acne Vulgaris – Pilot Study

Curriculum Vitae Kenneth Beer, M.D.

- Investigator**-A Multi-Center Neocutis Bio-restorative Eye Cream in the Treatment of Skin around Eye.
- Investigator**-Protocol for the Evaluation of Radiesse for the Treatment of Mid-Face Descent (Malar Augmentation).
- Investigator**-1520-IMI03 Open-label Safety and Pharmacokinetic Study of Aldara for Actinic Keratosis.
- Investigator**-A Single-Center, Open-label Clinical Study to Collect Preliminary Data on the Use of Sculptra Injections for the Treatment of Moderate to Severe Scarring from Acne or Varicella.
- Investigator**-A Randomized, Double blind, Placebo Controlled, Parallel Study Evaluating the Efficacy of S-Caine Peel (Lidocaine 7% and Tetracaine 7% Cream) to Provide Local Dermal Anesthesia for Pulsed Dye Laser Therapy in Adults.
- Investigator**-An Open-Label Safety Study to Evaluate the use of S-Caine Peel (Lidocaine 7% and Tetracaine 7% Cream) in Adult Patients Undergoing a Minor or Major Dermal Procedure.
- Investigator**- Protocol A Randomized, Double-Blind, Placebo-Controlled Clinical Trial to Determine the effects of COL-101 (Doxycycline Monohydrate Capsules) MR, 40 MG administered once daily in conjunction with Azelaic Acid Gel, 15% (Finacea) for the treatment of Rosacea.
- Investigator**-Protocol A Randomized, Evaluator-Blind, Comparison of the Safety and Efficacy of Restylane and Hylaform Plus for the Correction of Nasolabial Folds.
- Investigator**- A Randomized Double-blind, Double-Dummy, Multicenter, Non inferiority Phase III Study to Assess the Safety and Efficacy of Topical 1% SB-275833 Ointment, Applied Twice Daily, versus Oral Cephalexin, 500mg in Adults, or 12.5mg/kg (250mg/5ml) in Children, Twice Daily, in the treatment of Secondarily Infected Dermatoses.
- Investigator**- Phase IIIb, Open-Label Effectiveness and Safety Study of Imiquimod 5% Topical Cream in The Treatment of Actinic Keratosis.
- Investigator**- A Multicenter, Open-label, Prospective Study to Evaluate the Effectiveness and Safety of Etanercept in the Treatment of Subjects with Psoriasis. (Ease Study)
- Investigator**- A Clinical Study Evaluating the Safety and Efficacy of Botox Cosmetic compared with Placebo Injection, Strivectin-SD Topical Treatment, Wrinkle Relax Topical Treatment and Hydroderm Topical Treatment for the Temporary Improvement in the Appearance of Moderate to Severe Glabellar Rhytids.
- Investigator** – A Double Blind, Placebo-Controlled Study to Evaluate the Improvement of Joint and Skin Disease Subjects with Psoriatic Arthritis Receiving Enbrel (Amgen)
- Investigator** -A Single Center, Double Blinded, Placebo Controlled Study Of Botox for the Treatment of Subjects with Chin Rhytides Involving the Mentalis Muscle (Allergan)
- Sub-Investigator** A Randomized, Double Blind, Placebo Controlled Parallel Study to Assess the Safety and Efficacy of Rosiglitazone in the Treatment of In Chronic Plaque Psoriasis (Glaxo)
- Principal Investigator**- A placebo controlled study of low dose doxycycline for the treatment or rosacea (Collagenex)
- Investigator-Effects** of liposomal lidocaine on botox injections (Ferndale)

Community Service:

- Palm Beach County Medical Society – Ethics Committee
New Hope Charities Inc. – Advisory Board
Duke Children’s Hospital – Camp Kaleidoscope Board Member
Massachusetts General Hospital Cancer Center - 2007 Charity Dinner Host
